AIRTEL SYNC 2026 · ENTERPRISE TRACK A · PROJECT UDYAM DIGITAL

VyaparSetu (व्यापारसेतु)

Making Small Businesses Go Digital in One Sitting

A zero-touch, self-service digital acquisition & onboarding platform for India's 6 Crore+ MSMEs

⚡ **Zero Paperwork** | ⏱️ **<48 Hr Activation** | 📑 **Single Unified Bill** | 🔒 **DPDP Act 2023 Compliant**

SUBMISSION METADATA & TEAM CREDENTIALS

Team: Hacker_247 | Members: Abhishek Kokadwar & Sumit Sahu | Campus: ABV-IIITM Gwalior

GitHub Repo: github.com/abhishekKokadwar/vyaparsetu | Working Prototype: http://localhost:8000

SLIDE 1 · PROBLEM DIAGNOSIS · FUNNEL LEAKAGE

Funnel Reality: From 5,000 Leads to Only 368 Activations

Empirical diagnosis of the Q1 2026 dataset (smb_leads.csv) revealing where and why MSMEs drop out.

7.36%
Funnel Conversion (368 / 5,000)

17.6 Days
Average Lead-to-Activation Cycle

₹15,000
Blended CAC per Activated Customer

3.2 Calls
Customer Status Chase Calls per Lead

01 / FIELD SCHEDULING FRICTION

1,632 LEADS LOST (35.2%)

- 805 Unreachable after 3 sales attempts
- 531 Owner had no time for a field visit
- 296 Visits not scheduled by sales reps

Takeaway: Requiring a physical sales visit repels busy retail shopkeepers and doctors who work 12-hour shifts.

02 / QUOTE & PRICING FRICTION

1,006 LEADS LOST (21.7%)

- 385 Quotes complex or took 3-5 days to arrive
- 414 Price perceived too high
- 207 Competitor offered cheaper basic plan

Takeaway: Enterprise PDF quotes with cryptic product codes create decision paralysis and delay.

03 / PAPERWORK & DOCUMENTATION

273 LEADS LOST (5.9%)

- 94 Missing GST or Udyam physical papers
- 79 Found paperwork process too tedious
- 53 Authorised signatory unavailable
- 47 Document details did not match

Takeaway: Paper KYC creates friction; leads with GST activate at 9.6% vs only 2.0% without GST.

Core Diagnosis: Accel Business is losing high-intent MSMEs not on product quality, but on sales-led scheduling friction, delayed opaque quotes, and physical KYC hurdles.

Market Benchmark: Accel Business vs. Jio, Tata Tele & Local ISPs

Evaluating player capabilities across onboarding speed, pricing transparency, and integrated solutions.

JIO BUSINESS

LOW-PRICE COMMODITY

Strengths:
- Aggressive low price points
- Nationwide fiber footprint
- High brand recall

Gaps & Vulnerabilities:
- Rigid pre-packaged bundles
- Impersonal tier-1 call center support
- Poor customization for clinics & CAs
- No tailored cybersecurity packages

TATA TELE (TTBS)

CORPORATE ENTERPRISE

Strengths:
- Strong enterprise cloud & SaaS portfolio
- Trusted brand for large corporate IT
- Sophisticated multi-site SD-WAN

Gaps & Vulnerabilities:
- Expensive minimum commitments
- Neglects micro-retail (kiranas, salons)
- Slow, complex 2-week paper journey
- High dependency on dedicated sales reps

LOCAL FIBER ISPS

UNORGANIZED LOCAL

Strengths:
- Hyper-local physical presence
- Fast next-day cable pull & install
- Cheap single broadband pipe

Gaps & Vulnerabilities:
- Zero enterprise SLA or uptime guarantee
- Zero cloud email, CCTV or POS integration
- No cybersecurity, firewall, or failover
- Fragmented bills across multiple vendors

VYAPARSETU (AIRTEL)

THE WINNING VALUE PROP

Airtel's Right-to-Win:
- ★ **1-Sitting Digital Onboarding (<10m)**
- ★ **All-in-One Digital Stack:**
  - **Biz Fibre 100/300 + 5G AirFiber**
  - **Cloud POS, Email & 1TB Backup**
  - **Cloud CCTV + WhatsApp API**
- ★ **Single Unified Monthly Invoicing**
- ★ **99.9% Enterprise SLA & Support**
- ★ **Partner Coexistence with QR attribution**

Strategic Differentiator: Competitors offer single commodities (cheap pipe or complex SaaS). VyaparSetu delivers an integrated digital ecosystem on a single bill in under 10 minutes.

VyaparSetu: The 4-Stage Zero-Touch MSME Onboarding Journey

From discovery to activation in under 10 minutes on mobile in the business owner's preferred language.

STAGE 01 · 2 MINS
CONVERSATIONAL ADVISOR

- Multilingual Interface: English & हिंदी natural dialogue
- 4 Simple Questions: Business type, staff count, sites, spend
- Deterministic Rule Matching: Strict adherence to 25 catalog products
- Plain-Language 'Why': Explains telecom specs in direct daily business benefits
- Zero Human Delay: Replaces 3-5 day field visit

STAGE 02 · 2 MINS
TRANSPARENT QUOTE

- 100% Price Transparency: Transparent single monthly recurring cost
- Modular Add-on Toggles: Customize CCTV, guest Wi-Fi, 4G backup
- Live Dependency Solver: Prevents invalid product bundles in real time
- Quantified Savings: Highlights ₹13,800/yr savings vs fragmented vendors
- Single Monthly Bill: Consolidates all tools

STAGE 03 · 3 MINS
1-SITTING SMART KYC

- 1-Click Registry Autofill: Sub-second GSTIN & Udyam lookups
- Automated Expiry Check: Enforces 90-day validity relative to 15-Jul-2026
- Defect Detection: Catches cancelled, corrupt, and missing files
- DPDP Act 2023 Shield: Unbundled affirmative consent modal
- Dynamic PII Masking: Redacts PAN/GSTIN

STAGE 04 · <48 HRS
FULFILLMENT & TRACKING

- 5-Milestone Visual Tracker: Live status from order to activation
- Technician Dispatch Card: Assigned engineer's name, badge & visit slot
- Security Verification PIN: Eliminates technician impersonation
- SLA Countdown: Clear expectation setting
- Deflects 90% Status Calls: Cuts customer anxiety

Customer Impact: Transforms a 17.6-day painful sales and paperwork grind into a self-service 10-minute digital purchase completed on a smartphone in one sitting.

Full-Stack Architecture & Working Prototype Artifacts

Modular microservices architecture integrating client layer, catalog rule engine, and mock registries.

CLIENT & INGESTION LAYER

OMNICHANNEL EXPERIENCES

- Responsive Web App: Modern Tailwind CSS + Vanilla JS front-end served directly via FastAPI.
- WhatsApp Business Flow Bot: Meta Cloud API webhook gateway for zero-app friction.
- Partner Tablet Portal: Dedicated Assisted Mode for field force and channel partners.
- Live Self-Serve Tracker: Dynamic milestone renderer with engineer contact card.

ENGINES & MICROSERVICES

FASTAPI PYTHON BACKEND

- Catalog Rule Engine: Evaluates 25 products, enforces city tiers, GST checks, and requires_one_of dependencies.
- Conversational Advisor Service: Profiles 4 MSME archetypes, generates bundle reasoning in EN & HI.
- Registry Microservices: Sub-second queries against 3,534 GST records and 2,723 Udyam records.
- OCR & Date Evaluation: Native WinRT OCR parsing 47 KYC documents against 2026-07-15.

PROTOTYPE & REPO ARTIFACTS

VERIFIABLE SUBMISSIONS

★ Live GitHub Repository:
github.com/abhishekKokadwar/vyaparsetu

★ Working Local Prototype:
- **Run: 'py run.py'**
- **URL: http://localhost:8000**
- **SVG Viewer: http://localhost:8000/diagrams**

★ Demo Video Walkthrough:
3-Minute timed demo script (DEMO_SCRIPT.md) covering live K01-K12 verification.

Engineering Excellence: Built with Python 3.11, FastAPI, and modular services. Fully dockerizable, production-ready, and lightweight with zero external runtime bloat.

Planted Edge-Case Detection (K01–K12) & DPDP Act 2023 Shield

Automated document OCR, registry verification, and privacy-by-design compliance.

PLANTED EDGE CASES (JUDGE ANSWER KEY)

AUDIT OF 12 SPECIMEN APPLICANTS

Our Smart KYC engine accurately catches every planted issue in kyc_documents/:

- K01 (Vindhya Tours): REJECTED
  → GSTIN (37IHKXV5167L1ZS) is marked CANCELLED in official registry.
- K04 (Saffron Dental LLP): REJECTED
  → Corrupt, blank, or unreadable GST registration certificate image.
- K05 (Balaji Realty LLP): REJECTED
  → Missing mandatory Udyam MSME Registration Certificate.
- K11 (Trinity Bake House): REJECTED
  → Address proof dated 2025-10-31 is 257 days old (>90 days limit from 15-Jul-26).
- K02, K03, K06, K07, K08, K09, K10, K12: Fully verified and PASSED.

DPDP ACT 2023 4-PILLAR ARCHITECTURE

PRIVACY-BY-DESIGN FRAMEWORK

1. Notice & Explicit Consent (Sections 5 & 6):
   Unbundled, affirmative digital consent captured before KYC upload with cryptographic timestamp.

2. Purpose Limitation (Section 7):
   Data restricted strictly to service feasibility, line activation, and billing setup. Zero third-party sharing.

3. Data Minimisation (Section 8):
   Dynamic masking of central 6 PAN characters in GSTIN across logs and UI (e.g. 19EOGXXXXXX1ZL).

4. Storage Limitation & 30-Day Purge (Section 8(7)):
   Raw document images purged 30 days post-activation; retained only as tamper-proof SHA-256 hashes.

Regulatory Compliance: 100% compliant with the DPDP Act, 2023, while automating verification to approve legitimate small business owners in under 3 seconds.

Partner Coexistence & AI Propensity Dropped-Lead Salvage

Turning potential channel conflict into a revenue force multiplier with 12% commission incentives.

PARTNER ASSISTED MODE

ZERO CANNIBALIZATION

Empowering Existing Channel Partners & Field Force:

- Non-Digital Customer Assistance: Local partners use 'Assisted Mode' on tablets to onboard offline kirana owners in 1 visit.
- Direct Commission Attribution: Partner QR codes and referral IDs ensure 100% transparent sales commission tracking.
- Dramatic Productivity Multiplier: Field sales reps spend 10 minutes closing deals digitally instead of 2 weeks tracking down physical paper documents.
- Local Trust Anchor: Preserves the trusted relationship of local IT vendors while backing them with Airtel's enterprise network.

AI PROPENSITY DROPPED-LEAD SALVAGE

RECOVERING 4,632 DROPPED LEADS

Unlocking Massive Revenue from Historical Inbound Drops:

- Lead Scoring Engine: Evaluates 4,632 dropped leads across 6 dimensions (GST status, stage reached, spend band, employee count).
- 1,420 High-Propensity Targets: Isolates leads with >70 propensity score that stalled due to visit scheduling or complex quotes.
- Recoverable ARR Opportunity: ₹4.26 Crore in annual recurring revenue at ₹2,500/month average bundle value.
- Dedicated Commission Pool: ₹51.1 Lakh partner incentive pool drives hyper-targeted, high-conversion physical follow-ups.

Win-Win Ecosystem: Rather than replacing the field force, VyaparSetu equips channel partners with a superpower: closing leads 10x faster and recovering dropped pipeline.

Projected Business Impact Across 5 Core Metrics & 3-Year ARR

Radical reduction in acquisition costs, dramatic conversion surge, and multi-year recurring revenue.

7.4% → 24.5%
Lead-to-Activation Conversion
(3.3x Increase in Activated Base)

₹15,000 → ₹2,800
Customer Acquisition Cost (CAC)
(81% Reduction via Self-Service)

17.6d → <48 Hrs
Lead-to-Activation Cycle
(Rapid 1-Sitting Digital Setup)

3.2 → <0.3 Calls
Status Chase Calls per Lead
(90% Call Center Load Deflection)

FINANCIAL PAYOFF & UNIT ECONOMICS

CAC PAYBACK SLASHED TO 1.1 MONTHS

- Annual Incremental ARR: ₹3.8 Crore per 10,000 inbound leads.
- 3-Year ARR Trajectory:
  - Year 1 (Pilots in 10 Cities): ₹7.2 Crore ARR
  - Year 2 (Tier 1 & 2 Scale): ₹19.5 Crore ARR
  - Year 3 (Pan-India 6 Cr MSME Rollout): ₹44.8 Crore ARR
- Payback Period: Plunges from 6.1 months down to 1.1 months on a median ₹2,500/month micro bundle.

CUSTOMER RETENTION & NPS EXPLOSION

LTV SURGE VIA BUNDLE STICKINESS

- 6-Month Churn Reduction: Drops from 18.4% to <8.0% as small business owners rely on integrated bundles (Broadband + POS + CCTV).
- Net Promoter Score (NPS): Jumps from baseline 4.8 to 8.2+ driven by zero surprise billing and same-day digital activation.
- Customer Lifetime Value (LTV): Increases 2.4x from ₹27,000 to ₹65,000 as MSMEs expand their bundle with additional SaaS seats and cameras.

Conclusion: VyaparSetu establishes Accel Business as the undisputed digital backbone for India's 6 Crore+ small enterprises—combining rapid onboarding speed with enterprise reliability.
